with John Wilkerson

How have our beaches developed and what is their future? This will be the topic of geology instructor John Wilkerson who last spoke to our group on the geology of coastal Orange County. He will be considering:

1. Our retreating shoreline since the last Ice Age
2. The modern day shoreline
3. Interesting case histories: creation of Dana Harbor, Santa Monica Beach, coastal Orange County storm damage
4. Our beaches in the future:
 - a. Long term vs. short term erosion
 - b. What can be done to save our beaches?
